

HOW DOES PLUS90 WORK?

Gentle controlled volumetric heating of tissue reduces pain, improves blood circulation, and stimulates the muscles.

WHAT IS THE DOWNTIME?

Depending on the intensity of the treatment, there is little to no downtime. Most patients may have slight discomfort during and immediately after treatment. Some patients will experience no discomfort at all.

HOW MANY SESSIONS ARE REQUIRED?

Your physician will determine the best treatment plan for you. The majority of patients have 2-3 sessions, however, most notice a difference after only 1 treatment. The number of sessions depends on your treatment concerns, your personal goals, and if you plan to use a combination treatment or a single treatment approach.

Plus 90 offers immediate results,
with continued improvements
over time.

A Safe, Gentle and Effective
Solution for Feminine Health

WOMEN'S HEALTH & WELLNESS

PLUS 90

Previously, women did not have many options to improve issues that occur from aging.

Now, with new technology deploying gentle volumetric heating, women have more options to address their feminine health concerns of pain, blood circulation, muscle problems, or Genitourinary Syndrome of Menopause (GSM). There are now choices that are effective, easy and painless.

WHAT IS PLUS90?

PLUS 90 is a safe, effective treatment for feminine health and wellness that offers immediate results with continued improvements over time.

*Make a promise to yourself
to hold your well-being sacred.*

INTENDED USE

The treatment is intended for feminine wellness and approved for muscle stimulation, relaxation, pain reduction, fractional resurfacing, improvement of blood circulation, and for the treatment of the symptoms of Genitourinary Syndrome of Menopause (GSM).

According to the International Society of Sexual Medicine, GSM may affect about half of post-menopausal women.

GSM Symptoms include:

- » Dryness, burning sensations, and irritation in the genital area
- » Poor vaginal lubrication during sex, discomfort or pain with intercourse, and impaired sexual function
- » An urgent need to urinate, painful urination, or recurrent urinary tract infections (UTIs)

Women do not need to have all of the symptoms to be diagnosed with GSM.

COMMON FEMININE HEALTH CONCERNS:

- » Tissue aging
- » Low blood flow and sensitivity
- » Pain sensation
- » Weakening of the muscles

WHAT CAN I EXPECT?

Patients can expect to feel a heating sensation during treatment. Results can be felt and seen immediately, with continued improvements over the following weeks or multiple treatments.

Please speak to your aesthetic provider to see if PLUS90 is right for you.
